

AUDREY HAEGEL

ENGINEERING STUDENT

audreyhaegel2@gmail.com | +33652541074 | 7 Rue des Chevreuils, 67202 WOLFISHEIM, FRANCE

Nationality : French, EU Citizen

PROFILE

Currently in my final year of engineering school (general engineering degree ECAM LaSalle), I am a general engineering student with a strong focus on projects, innovation, and analysis. Experience in cross-functional coordination, process management, and initiative on industrial projects. I am looking for a 6-month end-of-studies internship starting in March 2026.

EXPERIENCE

CONSTRUCTION SITE SUPERVISOR - INTERNSHIP

May - August 2025, 14 weeks

Société Corse Travaux (VINCI Construction), Aléria

Coordination of on-site activities between civil engineering teams and subcontractors. Assistance with planning, progress monitoring, and supervision of the execution of the various phases of construction projects. Drafting of detailed technical execution procedures. Conducting topographic surveys and updating execution plans based on measurements taken in the field. Preparation of preliminary cost estimates. Verification of the work's compliance with technical standards and requirements.

OPERATOR - OPERATOR INTERNSHIP

June - July 2022, 6 weeks

Hager Group, Obernai

Welding of magnetic and thermal components for circuit breaker assembly.

Use of SAP ERP for managing production orders and updating production quantities. Visual quality control and verification of the conformity of the assembled components. Understanding industrial flows and supply/production challenges. Teamwork, 3x8 shift work on an automated production line.

EDUCATION

GENERAL ENGINEERING SCHOOL - ECAM LASALLE, STRASBOURG

2023-2026

Key modules:

Materials science & engineering (polymers, composites, corrosion);

Energy & thermal performance (modelling, optimisation, data-based analysis);

Design & digital modelling (CAD, mechanical sizing, eco-design);

Project management & industrial processes (Lean principles, process optimisation, industrial organisation, innovation and continuous improvement).

SCIENTIFIC PREPARATORY CLASS - LYCÉE ST. ETIENNE, STRASBOURG

2020-2023

Intensive scientific training in mathematics, physics and engineering, developing rigor, analytical reasoning and management of heavy workloads.

SKILLS

- Project management, technical creativity, teamwork.
- Advanced Microsoft Office Suite (Excel, PowerPoint)
- Data analysis
- Communication & presentation skills
- Quality & compliance: quality control, non-conformity analysis, procedure updates.

LANGUAGES

French: Native speaker

English: Professional level, TOEIC 975/990

ACADEMIC PROJECTS

CanSat Project - Miniature Satellite Design

Group project to develop a mini-satellite equipped with a complete telemetry system (pressure and temperature sensors, GPS, radio communication) for in-flight data collection and analysis. Participation in mechanical design, electronic integration, and embedded programming.

INTERESTS

Practicing classical dance for 14 years, climbing, skiing and reading.
