Subject: Application : New Business & Commercial Ecosystem Intern - 17041

Dear Sir/Madam,

I am currently completing my final year of engineering studies at Icam Strasbourg (ECAM LaSalle engineer degree), and I am looking for a 6-month internship starting in February 2026.

With a strong interest in innovation, project management, and business transformation, I am highly motivated to join PMI's New Business Commercial Ecosystems team and contribute to initiatives that shape the company's future.

Through my previous experiences at Vinci Construction and Hager Group, I have developed solid project management skills, the ability to work in fast-paced environments, and the maturity to coordinate multiple stakeholders. These internships also allowed me to work on process improvement, cross-functional collaboration, and data-driven decision making.

As part of my engineering training, I gained strong analytical skills, a structured and problem-solving mindset, and the capacity to explore new ideas with an entrepreneurial approach. I particularly enjoy working on innovation-oriented initiatives, identifying opportunities, and transforming concepts into actionable solutions. The prospect of supporting PMI in the development of new business ecosystems, engaging with start-ups, universities, and external partners, and contributing to high-impact strategic projects strongly resonates with my interests and aspirations.

I am especially drawn to PMI's ambition to disrupt its industry and build a smoke-free future. This requires bold thinking, openness, and the ability to challenge established models, values that match the way I work. I am motivated by environments where innovation, agility, and collaboration drive long-term strategy and where new technologies open new opportunities.

Fluent in English (TOEIC 975), proficient in Microsoft Office Suite, and comfortable with data analysis and strategic synthesis, I am confident in my ability to contribute to research, market analysis, opportunity mapping and project execution within your team. I enjoy working autonomously while maintaining strong communication with cross-functional teams, and I am eager to learn from a global company known for its culture of innovation and excellence.

I would be thrilled to bring my energy, curiosity, and problem-solving approach to PMI, and I would welcome the opportunity to further discuss my motivation with you.

Thank you for your time and consideration.

Sincerely,
Audrey HAEGEL, 5th-year engineering student at Icam Strasbourg
